HANKINSON NURSERY CO., Inc.

Established 1903

Hankinson, North Dakota

A Note To Home Owners:

Special to new home owners: Take advantage of our landscape service. Send us the dimensions of your yard and a rough sketch showing where the house is located on your lot. We will draw you a scale plan free of charge and make planting suggestions using the plants from our catalog.

If you want our complete landscape service our representative will call on you and make a complete estimate from filling in the dirt to the planting of the stock.

Our nursery stock is grown at the Nursery farm at Hankinson, N. D., and patrons are invited to visit the farm at any time and see the growing shrubs and trees. The stock grown here is entirely hardy all over the northwest as well as farther south.

Our plant propagator has 35 years experience and was imported direct from Holland by the Hankinson Nursery Company. He can grow any plant that is hardy in this country, including many not listed in the catalog. If you want some plant not listed write in for it and we will supply you.

With every order, you receive the Hankinson Nursery Company's little booklet "How to Plant" which contains complete detailed instructions on planting, pruning and insect control.

A Word About Shipping:

Terms: All orders under \$10 are cash. Over \$10, cash with order or 25% down payment and the balance C.O.D. These terms are F.O.B. Hankinson except on bulbs, strawberries and small orders shipped by mail prepaid. Tell us how to ship, viz. express, freight, parcel post, truck, etc. If you do not state how to ship we will use our best judgment and all stock will be shipped at the proper planting time on either spring or fall deliveries.

APPLES King of Fruits

The Apple is the first in importance of all fruits. It will thrive on nearly any well drained soil. Its period of ripening, unlike other fruits, extends nearly through the whole season. By making a careful selection a constant succession can be obtained. There is no fruit that is more indispensable for family use.

Our Apples are varieties that have been developed especially for this northwest country, are hardy strong growers, and highly recommended to you, our customers.

HARALSON

Haralson

Red—Hardy—A Keeper. A real winter apple for the Northwest. Haralson is a hardy, high quality, red, winter, eating apple that will keep until late spring in ordinary storage. It has been correctly called the Northwest's best winter apple.

The tree is an up-right grower with a strong, wide angle crotch and branching system. It is a vigorous tree, very productive and resistant to Fire Blight. The fruit is about the size of Wealthy, is borne at an early age, and hangs onto the tree until picked. The fruit is an attractive red in color and very good in quality. Entirely hardy. No home or commercial orchard is complete without Haralson. Season January to April.

Anoka

(Early bearing.) Bears very young, often fruiting the year after planting. Ripens a few days before Duchess. Attractive yellow, streaked red. Good flavor.

Patten Greening

A very hardy Apple of large size. Green in color, of good quality for eating and cooking. Keeps until mid-winter.

Delicious

The finest of all dessert Apples. Commands the highest prices in all markets and is a fine keeper and shipper. Very distinctive in appearance and famous for its crisp "delicious" flesh. There is always room for more Delicious.

ORCHARDS ARE PROFITABLE

Apples Early and Fall Varieties

Yellow Transparent

The old favorite yellow summer Apple. Very hardy and productive. Of high quality.

Cortland

One of America's best Apples. Of large size, beautiful red color. Superb in quality. Good both for eating and cooking. Bears abundantly.

Wealthy

A leading commercial Apple. Fruit of highest quality, keeps well. Juicy and of sprightly flavor.

Prairie Spy

Extremely high in quality and extra fine flavor. Good both for cooking or eating out of hand. A late keeping variety. An attractive red Apple, heavy cropper, hanging well to tree, carrying good loads of fruit until ready to pick.

Beacon

An early Apple, but unlike other varieties not quickly perishable. Keeps easily into the Wealthy season. A good handling and keeping quality, together with all-red color, makes it a very exceptional early Apple. Beacon has established itself satisfactorily throughout the northwest. Very hardy and early in maturity.

Minjon

A Minnesota Jonathan. Very hardy, growing and producing far north. A most attractive, medium size Apple, brilliant red and all-red. Closely resembles Jonathan. Bears abundantly and regularly, and hangs well on tree.

Northwest Greening

The popular, old-time, long-keeping Greening. Giant in size. Fruit large, firm and fine grained, yellowish green with crisp, juicy flesh. Splendid for cooking.

Duchess

Season, July and August. Tree upright, vigorous and extremely hardy. An early and annual bearer of uniformly large crops. Fruit large, greenish yellow, with red stripes. Flesh light yellow, medium fine grain, firm; flavor a pleasant acid; a great cooking and fine market sort.

SPECIAL OFFER

All paid in full orders, that is, orders with which you send the full amount of cash will be shipped PREPAID.

3 Crab Apples

Whitney Crab

Perhaps the most popular of all Crab Apples. Fruit large, light yellow striped red. Flesh crisp. Excellent for eating, canning and pickling. A heavy cropper, perfectly hardy and immune to blight.

Whitney Crab

Virginia Crab

Golden yellow, flesh white. Mildly sub-acid in flavor. Round and medium in size. Ripens in September.

Dolgo Crab

Dolgo Crab

The perfect Crab. Hardy everywhere. Heavy bearer, usually beginning the year after setting. Jells perfectly even when dead ripe. A fine ornamental tree for lawn as well as a wonderful commercial sort. Rapidly displacing such varieties as Transcendent and Hyslop.

HARDY PLUMS

The plum like the apple and other finer fruits, succeeds in any good loam soil and being almost entirely free from disease, they can be grown very profitably. Of late years the demand for plums has increased very rapidly. The finer kinds are excellent dessert fruits, of rich and luscious flavor; for cooking and canning they are unsurpassed. For home consumption they should be gathered a few days earlier. Some of the varieties are inclined to overbear and should be thinned in order to produce perfect fruit. Most all the varieties, especially the native sorts, are extremely hardy and resist the most severe weather. The cherry-plum hybrids are especially good and have been developed especially for the northwest.

Underwood

Plums

Waneta

Really a masterpiece. Large, bright red fruit often exceeding two inches in diameter.

La Crescent

An attractive, golden yellow Plum of large size. Very hardy and productive. Excellent quality.

Red Coat

A highly productive, medium sized, Prune-shaped Plum. All red, with a perfectly free stone. Well worthy of a place in any orchard or home yard.

Superior

A sensational new Plum. Very large, jumbo in size. Flesh firm and of delicious quality. Beautiful red color and delicious to eat out of hand. One of the better Plums for home and market.

Underwood

Earliest of the large Plums and an annual bearer. Attractive fruit of splendid quality ripening over a long period.

PIPESTONE

Pipestone

A delicious, large, new Plum. Very productive, early red Plum of high quality. Begins to ripen the fore part of August. One of the largest hybrid Plums. Excellent for canning.

EMBER

Ember

A new canning Plum. Good size, rich golden red blush. Hangs on tree until ripened and then keeps two weeks. A splendid variety for either home or for market.

Plum-Cherry Hybrids

OPATA

Opata

Immense crops of medium sized fruit of pleasing flavor borne annually. Fine quality and the earliest of Plums to ripen. Flesh green in color.

Sapa

Early, medium to large fruit. Fine for canning. Trees bear young, heavily and with great regularity. Attractive purple flesh, fine flavor.

PLUM-CHERRY HYBRIDS (Continued)

Oka

Immensely productive, bearing year after setting. Heavy annual bearer of large, delicious fruit. Tree very hardy and of dwarf habit.

Compass

A large, bright red hybrid Plum-Cherry of good quality. It is fine for canning and preserves.

PEARS

Parker

(Hardy). A splendid new Pear originated by the Minnesota State Fruit Breeding Farm. Of fine quality. Early, large size, tender and appetizing. Trees bear young and heavily. Highly recommended.

Patten

(Hardy). Strong, vigorous grower, apparently free from blight. Recommended highly for planting in the Northwest. Fruit of Bartlett type, large, tender, juicy and good quality.

Bantam

Mendel

Minnesota No. 4

Prices Listed Above

SMALL FRUITS

Cherries

There are few more desirable fruits than the cherry. They are being planted more and more each year and there is always a brisk demand for good fruit.

Cherries thrive in most any dry or well-drained soil. The fruit is delicious whether eaten out of hand or preserved. No home garden is complete without a few cherry trees.

Nicollet

Nicollet

Probably the most valuable of any of the Cherry-Plum Hybrids produced by the Minnesota State Fruit Breeding Farm. In describing this variety Prof. W. H. Alderman says: "Nicollet is the nearest approach to the true sour cherry that has been produced by the Minnesota station. The small red fruits closely approximate the cherry in size, color, and general appearance. The pit is typically cherrylike, and may be squeezed from the flesh. The

flavor and quality are such that the fruit may be used for sauce or pies, and be almost indistinguishable from the true sour cherry."

The tree is a dwarf, bush like, hardy sort and finely branched. The color is a dull cherry red with a greenish yellow flesh. It is desirable to plant Zumbra near it for pollination. Nicollet should be grown in all home gardens or commercial plantings, for it is a heavy producer of attractive fruits which are the equal of any sour cherry for cooking purposes.

Montmorency

A beautiful large, heavy bearing Cherry. About ten days later than Early Richmond, extending the season. A favorite commercial variety.

June Berries

Dwarf Juneberry

Fruit borne in clusters. Reddish purple, changing to bluish black. Excellent for canning. The fruit is eagerly devoured by birds, which leave the finest fruits untouched where this is plentiful. A native of North Dakota.

Early Richmond

Earliest of all Cherries and an old favorite. Beautiful fruit, juicy, rich, acid in flavor.

Buffalo Berries

Buffalo Berry

(*Shepherdia argentea*). Stout, thick branches, with a profusion of spurs, and thickly covered with foliage, light green above and silvery beneath.

Sand Cherries, Bush Cherries

Sand Cherry and Bush Cherry are two native varieties. The Bush Cherry is one of Professor Hanson's developments.

Zumbra is an old popular sweet cherry which does very well in this country.

SANDCHERRIES

Few wild fruits have taken so well to cultivation as has the South Dakota Wild Sand Cherry. Small dwarf growing when in the wild, and larger and more vigorous growing when under cultivation and each succeeding generation seemingly improving in flavor and size of fruit. The silvery, glossy color of the leaves in summer and

especially on windy days is a beautiful sight. The brownish red stems in winter make pretty winter scenery. Splendid to plant on the lawn in front of taller shrubs. The fruit makes fine preserves and usually good eating. A plant which combines beauty and utility that every home should have.

CHERRY, JUNEBERRY, BUFFALO BERRY, BUSHCHERRY and SMALL FRUITS PRICES

12 to 18 inch size	Each 55c	Per 10 \$5.00
18 to 24 inch size	Each 70c	Per 10 6.00

Gooseberries

Pixwell

A new Gooseberry originated in North Dakota. Very hardy, excellent quality, hanging on long stems for easy picking. Berries large, oval, attractive light green, ripening pink.

Each 85c 10 for \$7.00

Carrie

Each 70c 10 for \$6.00

PIXWELL

Raspberries

The Raspberry is one of the most delicious and popular fruits grown. They are always in demand in season and command good prices on the market. For canning purposes they are unexcelled. They are easily cultivated and require little care.

Chief

The early, big money Raspberry. All the good qualities of Latham and ten days earlier. Very resistant to mildew. Plants sturdy and very hardy. Fruit attractive, firm, juicy, of high quality; does not crumble. Plant Chief for early, high-priced berries.

Indian Summer

(Everbearing). The best of all everbearing Raspberries. Fruit is large, conical and of very high quality, bright red in color.

Cumberland

Most commonly called "Blackcap" Raspberry. Fruit medium in size and of fine flavor. It is a heavy cropper and very dependable. Good for home use and a fine commercial variety. The bushes are sturdy and quite hardy, although some winter protection is desirable in the extreme North.

Alfred Blackberry

The coreless Blackberry. A vigorous grower, the plant is strong and well able to carry its immense crop of fruit. Ripens early and continues over a long season. Berries large, sweet and delicious. Some winter protection is desirable in extremely severe climates.

Blackberry Prices

10 for	\$1.40
25 for	3.15

Strawberries

Few fruits offer greater returns for land and labor invested than strawberries. With little care and attention they thrive in most any soil, while extra efforts and cultivation will be rewarded by especially fine crops. Whether you grow for market or home use only, have the best sorts by all means. Below and on the next page we list the cream of all for this part of the country.

DUNLAP

Currants

The Currant is one of the most valuable of small fruits. They mature just before raspberries and can be used either raw or cooked. Being very hardy, they do not winter kill, and are easy of cultivation, requiring little care. They can be grown in any good garden soil.

Red Lake

A real improvement in Currants. Big berries in long well filled bunches. Bushes thrifty and very productive. Bring top prices. A splendid money-maker. Originated in Minnesota.

Wilder

One of the best Currants grown. Bright red berries of splendid quality.

Currants (All varieties)

Each 55c Per 10 \$5.00

Grapes (All varieties)

Each 50c Per 10 \$4.50

RED LAKE Currant

Grapes

Beta

The hardest, most widely grown and profitable Grape for the far Northwest. Can be grown far north because it ripens so early. Immense crops of highest quality fruit, valuable for jelly and juice. Needs no winter protection.

Concord

A very popular and profitable commercial variety, but not so good for northern climates as Beta. Our representative will advise you as to which variety is best suited for your needs.

GARDEN ROOTS

WASHINGTON

Asparagus

Washington

The very finest of all Asparagus. A pedigreed strain, bred to resist rust. The shoots are thick and heavy, of unsurpassed flavor. The yield is extremely heavy. Asparagus is a fine ready-money crop, easy to sell on the local market.

MacDONALD RHUBARB

EVERGREENS

PYRAMIDAL ARBOR-VITAE

Replace outworn shrub plantings with evergreens. Immediate, permanent beauty year around.

Pyramidal **ARBOR-VITAE**

Beautiful, slender, pointed trees with thick, lacy, bright green foliage. Fine accent points in the foundation planting or for formal use.

American **ARBOR-VITAE**

A very popular evergreen for the corners of a foundation planting, for screens or lawn specimens. A compact, graceful pyramid, easily kept trimmed to any size desired. Foliage beautiful, flat and dense. Widely used for permanent, hardy, clipped hedges.

Siberian **ARBOR-VITAE**

An imported type, growing in the form of a rather broad pyramid. Dense, bluish green foliage makes it distinctly different and attractive.

Spruce

Colorado Blue Spruce

The perfect specimen tree. Broad, pyramidal shape, the lustrous blue foliage reaching clear to the ground. Its shapeliness and distinctive color make an eyesatisfying spectacle. Truly the "King of Evergreens."

Norway Spruce

Has every attribute of the perfect wind-break tree. Thick, interlacing branches clear to the ground. The most rapid grower of all the Spruces. It is also a shapely, desirable specimen tree and ideal for landscape planting.

Colorado Green Spruce

Broad, even pyramids of rich green. Graceful branches with heavy foliage clear to the ground. Vigorous and hardy. Splendid for individual specimens or groups.

Black Hills Spruce

Perfectly symmetrical, with heavy, thick foliage, somewhat bluish. Extremely hardy and easy to establish. Ideal for the single isolated specimen on the lawn. One of the best for windbreaks.

Mugho Pine

These low, ball-shaped, dark green little evergreens are ideal for foreground work in foundation or mass plantings. In the spring the new growth looks like multitudes of tiny candles. Very hardy and useful.

Scotch Pine

Though stocky and bushy while young, these Pines gradually take on a picturesque irregularity of outline as they grow older which is very attractive. Hardy, extremely rapid of growth, and tolerant of soil, they are ideal for windbreaks.

DOUGLAS FIR

Douglas Fir

A grand, deep green, rather tall and narrow pyramidal growing more beautiful each year. Very hardy and drought resistant.

Pfitzeriana Juniper

The most graceful and useful of all low growing evergreens. Feathery, gray-green foliage. May be used for foreground work, or staked up to form a low, broad pyramid. Splendid for planting along foundation underneath windows.

Scopulorum Juniper

A very neat, compact, pyramidal Juniper with beautiful green to silvery foliage. Does not turn brownish over winter.

Virginiana Juniper

Broad, tapering pyramid with thick, feathery foliage. Extremely hardy and adaptable to almost any conditions. Very graceful in natural shape, but can be readily sheared to any size or shape. A most satisfactory evergreen and one of the most widely grown.

PFITZERIANA JUNIPER

SCOPULORUM JUNIPER

Savin Juniper

Dark green, feathery foliage and dense spreading branches make the Savin Juniper an ideal plant for the foreground.

ORNAMENTAL Trees

HORSE CHESTNUT

American White Elm

Our noblest shade tree, large and spreading, combining strength and grace. They grow anywhere and are very long-lived. An ideal street tree and for large lawns there is nothing finer. The charm of the old New England villages is largely associated with their ancient Elms.

Chinese Elm

A remarkably beautiful, rapid growing tree that has leaped to popularity. Unusually hardy and resistant to heat and drought, it will do well over a wider range of soils and conditions than any other tree.

MOUNTAIN ASH

Mountain Ash

Semi-dwarf lawn tree with straight, smooth trunk and fine-cut leaves on somewhat drooping branches. White flowers in May, followed by brilliant orange-red berries which cling all winter. An interesting and distinctive specimen tree.

Green Ash

Tall growing tree with dark green foliage, changing to gorgeous shades of purple and yellow during the fall months.

Norway Maple

Well liked for its pleasing and symmetrical dome-shaped head. Dense leaves are rich green in color and hold on the tree fully two weeks longer in fall than other Maples. One of the best trees for lawn or boulevard plantings.

Schwedler's Maple

All the good points of the Norway Maple and in addition the leaves are purplish red. A most striking, shapely tree for the lawn or avenue. In midsummer the leaves are purplish green and in autumn they turn yellow.

HOPA CRAB

Cut-Leaf Weeping Birch

The most beautiful and graceful of all trees. Effective planted singly, but best in groups of two or three. The white bark and finely cut, graceful leaves go well with evergreens, relieving the monotony in a large planting.

Niobe Weeping Willow

A beautiful and distinctive background tree with its green foliage, silvery beneath, and golden yellow bark and twigs.

CUT-LEAF WEEPING BIRCH

ORNAMENTAL SHRUBS

People, generally, are appreciating more the permanent value and beauty of shrubs. The charm and grace they lend to home grounds is invaluable, and, if judicious selection is made, it is possible to have a continuous succession of bloom from early in April to the days when the frost again nips the flowers of the very latest bloom.

In many cases it would be better to plant shrubs in groups of several to one side of the lawn instead of following the method of planting one in a certain place and spoiling the effect of the open lawn. In most cases, three, six, eight, or twelve of one variety should be used in a particular grouping. Several such groupings make an excellent border or foundation planting.

Flowering Almond

Before other shrubs have budded out, the pink or white, double flowers of the Flowering Almond envelope the small, graceful plants.

Buddleia (Butterfly Bush)

(Butterfly Bush). Graceful shrub with arching branches tipped with long, lilac-like heads of fragrant flowers.

Barberry, Red-Leaved

A rich bronzy red form of the Barberry. Equally hardy and healthy. Colorful for foundation work, hedges or isolated specimens.

Purple Plum

Used for its beautiful contrasting foliage. These small, shapely trees make beautiful lawn specimens or work in with larger shrub plantings.

Golden Elder

The golden foliage contrasts well with the green of other shrubs. A large shrub excellent for massing. Large, flat, creamy blooms followed by purplish, edible berries.

Barberry Thunbergi

A perfectly hardy, healthy, roundish shrub ideal for hedging or foundation work. Bright green in summer, brilliant red in autumn with long-lasting scarlet berries.

Forsythia (Golden Bell)

A profusion of golden blooms in early spring even before the leaves appear. The first shrub to bloom following winter's icy blasts.

GOLDEN ELDER

Evergreen and Shrubs add all-season charm and beauty to your home. The beautiful flowering shrubs break the monotony of the evergreens during the summer months with their colorful array of blooms. During the cold, winter months the evergreens stand guard as sentinels to the home.

Hybrid French Lilacs

An immense improvement over the common forms of Lilacs, and available in a wide range of colors. Hardy, shapely shrubs with immense, graceful heads of bloom. Useful in a wide variety of locations, either as lawn specimens or in the background of borders or foundation plantings. Many other varieties are available besides the those shown.

TARTARIAN RED HONEYSUCKLE

Morrowi Honeysuckle

Splendid large plant, its wide-spreading branches thickly laden with creamy white flowers in their season, followed by crimson berries in July. Fine as a background or to screen blank walls or undesirable views. Also useful as snow fence or windbreak.

Tartarian Red Honeysuckle

Robust and beautiful large shrub, at its best as a background or screen. A wealth of small, fragrant, light crimson flowers followed by orange berries. Hardy. Grows rapidly in any location.

MORROWI HONEYSUCKLE

Hydrangea P. G.

Great nodding heads of flowers coming out in late summer, first greenish white, then gradually turning pink and finally bronze, make this one of our most beautiful and useful shrubs. One of the most magnificent of the late-blooming shrubs. Thrives best in partial shade.

Hydrangea Arborescens

(Hills of Snow). Does extremely well in shaded locations. Large, green, heart-shaped leaves are attractive in themselves, but when the immense crop of large, flat heads of white flowers come in, it is a sight wonderful to behold. Very hardy and widely useful.

Beautify Your Yard with Shrubs

Syringa Lemoinei

A fine shrub of medium height with very attractive foliage. Produces a wealth of large, white sparkling blooms, very fragrant and sometimes semi-double. A splendid subject back of the dwarf shrubs used in the foreground of the border or foundation planting.

Syringa Virginiana

Truly magnificent, and generally conceded the finest of all the Mock Oranges. The bush is handsome in shape, foliage good. The extra large white flowers come five to seven in a cluster, some single, some semi-double and some full double. Exceptionally long blooming season, almost an ever-bloomer.

Syringa-Mock Orange

This tall, vigorous shrub is invaluable as a screen or background. In May and June, it has white, waxy blooms of delicious fragrance. One of the most useful of all tall shrubs.

Snowberry, Red

Dwarf foundation shrub of good form, with thick, fine foliage. The small red fruits are thickly clustered along the ropelike branches, weighing them heavily into an attractive drooping appearance. Fine companion plant for the White Snowberry.

Snowberry, White

Pink flowers in midsummer, followed by attractive, large berries of snowwhite. Very showy, thriving well in shaded locations.

Snowball

Large, white, ball-shaped blooms early enough for Decoration Day. A tall shrub, justly popular for background use and the value of its gorgeous display of bloom in the May garden.

HIGH BUSH CRANBERRY

High Bush Cranberry

Tall and sturdy background shrub with handsome, bright green foliage, setting off well the soft, flattened heads of white flowers. The most distinctive feature is the bright red berries which hang in clusters all winter.

Tamarix

A tall, graceful shrub with dense, feathery foliage and long, loose sprays of tiny pink flowers, mistlike in appearance. Does well anywhere, sun or shade, wet or dry.

TAMARIX

Viburnum Dentatum

Showy, glossy green foliage. White flat flowers followed by deep, steel-blue berries in September. A good plant for shady locations.

**SPIREA
VAN HOUTTEI**

Spirea—Anthony Waterer

The finest of all dwarf shrubs. A great wealth of bright red flowers in July, continuing with a more moderate covering of flowers until frost. Very popular for the front row of foundation plantings.

Spirea—Snow Garland

Graceful and beautiful, blooming in early May. Of medium height, with distinctive, dark-green, feathery foliage.

Spirea—Thunbergi

A beautiful shrub with numerous slender branches, forming a dense, feathery bush 3 to 4 feet tall. Leaves narrow, bright green, fading in autumn with brilliant tones of orange and scarlet. Flowers pure white, appearing in great profusion in earliest spring and covering the plant as with a mantle of snow. One of the latest shrubs to shed its foliage.

Spirea— Van Houttei

An old but deservedly popular shrub, it has a myriad uses and is perfect in every one. One of the hardiest and easiest to grow of all shrubs. Ideal as specimen plant, in the foundation planting, as a screen or hedge, either trimmed or untrimmed. Beautiful with its healthy, tiny leaves, but magnificent beyond description when completely enveloped with its long, drooping sprays of tiny, pure white flowers in May and June.

HEDGES FOR LIVING BORDERS

Cotoneaster Ornamental Hedge

Beautiful, low growing type. White flowers in spring. Attains about 3 foot height. Very hardy.

Barberry—Thunbergi

Makes a beautiful, rounded, thorny hedge, hardy in the extreme and succeeding everywhere. May be trimmed for a low hedge, or allowed to grow naturally. The tiny bright green leaves turn red in autumn and the red berries hang on well into the winter.

Russian Olive

A fine tall shrub for background use or as a high screen. The distinctive gray-green foliage makes a fine contrast with shrubs or trees of the usual green color. Useful for the ends or corners of a tall mixed shrubby hedge or border.

Spirea—Van Houttei

The most beautiful of all flowering hedges. Naturally a fairly tall, broad, graceful hedge. It may be clipped severely for more formal uses. Small, bright, green leaves and a gorgeous display of spring flowers.

Alpine Currant

Ideal for a formal hedge of medium height. Dark green, glossy foliage, turning to bronzy shades in autumn. Does well in shade or sun. Also a useful plant for the shrub border in combination with other shrubs.

HARDY VINES

PRICE LISTING VINES

American and Engelmanni Ivy	Each .70	10.. \$6.30
Scarlet Trumpet Honey- suckle	Each .90	10.. 8.40
Gold Flame Honeysuckle	Each 1.25	10.. 11.00
Clematis, All Large Flowering	Each 1.40	10.. 13.00

Clematis Jackmani

Large flowers, four to six inches in diameter, of intense violet-purple, with a rich, velvety appearance, distinctly veined. Blooms continually from July until frost.

Gold Flame Honeysuckle

A fine, new vine which blooms constantly from early spring until late fall. Delightfully fragrant flowers in large, showy clusters.

Clematis

Madame Edouard Andre

The crimson Jackmani. A strong, vigorous grower, very free in bloom. Color a distinct crimson-red.

ROSES

PAUL NEYRON

Paul Neyron

The largest of all Roses in cultivation, and one of the best. Sturdy bush, profuse producer of immense, clear pink, very fragrant blooms.

Red Radiance

Large, double, bright red Roses, keeping well when cut. Fine bloomer.

General Jacqueminot

Clear red flowers of excellent shape. Lovely color and fragrance. An old favorite and still very popular because of its excellence.

FRAU KARL DRUSCHKI

HARRISON YELLOW

Harrison Yellow

The best of all hardy, yellow Roses. Very double, large blooms. Plant an erect grower, of vigorous habit.

Frau Karl Druschki

The best of all white Roses. Vigorous producer of large, white and perfectly shaped blooms. Sturdy plant and continuous bloomer.

AMELIA GRAVEREAUX

Crimson Rambler

A fine climber with large clusters of bright crimson, miniature Roses. Very hardy and satisfactory.

Baby Rambler Bush Rose

A dwarf bush Rose with blooms like those of the Crimson Rambler. Available in three colors: Red, white and pink. Makes a fine little flowering hedge for edging walks and drives. Also works in well as a foreground for evergreen plantings at the corners of the home.

Dorothy Perkins

Ideal trellis Rose. Innumerable clusters of fragrant, shell-pink Roses. Rapid grower and profuse bloomer.

Hardy Rugosa Roses

Amelia Gravereaux

A fine Rose, hardy in any climate. Strong shrub bearing well shaped, double, very fragrant, dark purplish red flowers all summer long. It is a Hybrid Rugosa and has the thick, shiny, dark green foliage characteristic of its class.

CLIMBING ROSES

Add Beauty to your Home

Paul's Scarlet Climber

Today's most brilliant and popular red climbing Rose. Hardy and dependable, a profuse bloomer. The flowers are fairly large, very vivid, and unfading.

BABY RAMBLER BUSH ROSES

Red White Pink

Climbing American Beauty

Brilliant carmine flowers of fine form and rich perfume, borne in clusters.

PEONIES

Baroness Schroeder

Plume-shaped flowers with irregularly shaped petals, sometimes fringed. Opens delicate blush, changing soon to pure white. Strong grower and free bloomer. Delicate fragrance.

IRIS

PERENNIALS

IRIS and LILIES

Tiger Lily

The favorite of our grandmothers' gardens that has retained a prominent position through sheer excellence. Too well known to need description.

Iris

No flower more lovely for border plantings, or cut flower purposes, than Iris. Plant several varieties for vivid color blooms.

Perennials (continued)

Columbine

Long-spurred hybrids, a distinct improvement. Dainty, many colored and long blooming.

SHASTA DAISY

Hardy Phlox

Many grand effects may be achieved with these most satisfactory, hardy plants. Equally good in beds by themselves, in clumps in the perennial gardens, or as an edging for shrub or evergreen plantings. They are easy to grow and their tall, waxy trusses fit perfectly into any scheme. The range of colors is wide. Some have distinctive eyes, others are solid colors. All are beautiful and some of them are essential in any well planned garden. Many varieties.

Delphinium

Tall stately spires for the background of the flower garden.

Shasta Daisy

Fine large white daisy freely produced in June. Excellent for cut flowers.

Customer Satisfaction:

Customer satisfaction is the foundation of our business and therefore the aim of every department in our organization. Our thousands of satisfied customers have helped us grow since 1903 and as a result of this customer satisfaction we are one of the largest growers of nursery stock in the Northwest. We represent our stock to be exactly what we say it is and we back up this Guarantee 100%. If you are not acquainted with us we are glad to be able to say, "Ask your neighbor".

A Word About Fall Planting:

In a dry country fall planting has certain advantages over spring planting in this way, when the frost goes out in spring your trees and shrubs are in the ground, get the benefit of the runoff moisture from melting snow and start growing much earlier than if spring planted. They thus gain several weeks growth in their first growing season, and to any transplanted plant the first year is the vital period in which the plant establishes itself for future growth. We highly recommend fall planting. September and October is an ideal time to transplant evergreens.
